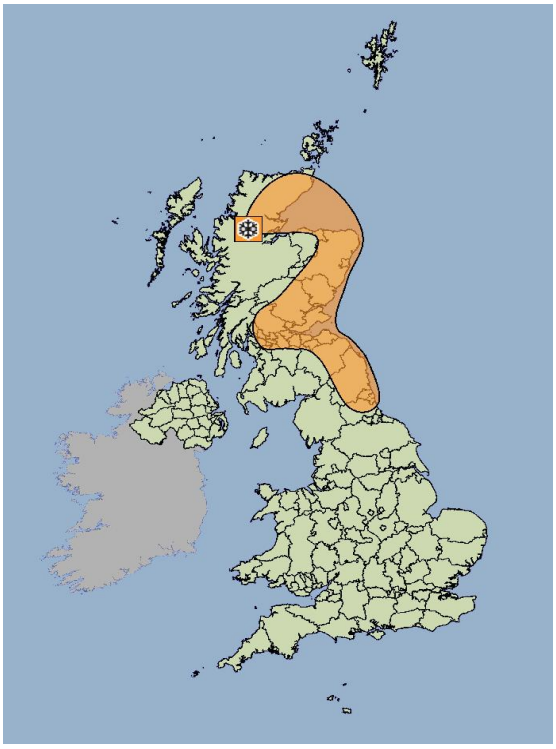
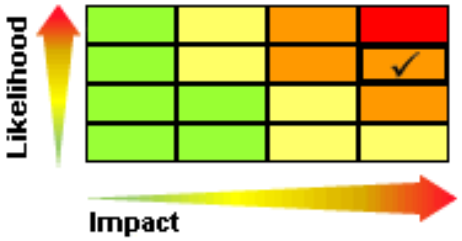
National Severe Weather Warning Service





Chief Forecasters Assessment
Snow showers will bring variable snow cover, but parts of northeast England and Scotland are expected to see the most frequent and organised snow showers from Wednesday morning to Thursday morning.

During this time, 5-10 cm of snow is expected quite widely. Where showers become organised though, most likely across Scotland, areas of 15-25 cm are likely, locally as much as 40 cm. Strong winds will lead to drifting of snow and severe wind chill, while lightning could be an additional hazard, particularly near coasts.

This warning has been updated to include a greater part of the Central Belt and increase the impact level based on the latest information.

The Met Office have issued an **Amber Warning** of **Snow**

Valid from **06:00 on Wed, 28th Feb 2018** until **12:00 on Thu, 01st Mar 2018**

Frequent and heavy snow showers are expected on Wednesday and Thursday leading to some significant accumulations developing.

Long delays and cancellations on bus, rail and air travel could occur. Roads may become blocked by deep snow, with many stranded vehicles and passengers. Communities might be cut off for several days. Long interruptions to power supplies and other services such as telephone and mobile phone networks, could occur.
